

# Deliver a consistent user experience on any device with Citrix Virtual Apps and Desktops

With people working in disparate locations and on a variety of devices, the delivery of a superior user experience has become a priority. For offsite employees and field workers, access to your critical business applications can be a major headache. Slow load times, disrupted connectivity, and incompatibility with mobile devices are all common issues faced by the modern mobile workforce.

Citrix Virtual Apps and Desktops provides a complete solution to overcome these challenges. Wherever your workforce is located, you can give them the freedom to work securely on any device—while cutting IT cost and complexity. You can deliver virtual apps and desktops within a modern digital workspace from any environment or any cloud—public, on-premises, or hybrid.

## Citrix Virtual Apps and Desktops offers unparalleled user experience

### Adapt to changing business needs

Enable flexibility to address shifting business requirements by delivering a full virtual desktop or the apps needed by employees to their preferred device.

### Secure your digital business

Reduce the risk of data loss, prevent unwanted intrusions, and ensure safe access to web apps on demand by establishing policies based on user location, device-specific features, security configurations, and more.

## Ease the migration to Windows 10

Simplify the OS migration process by centralizing the delivery of Windows 10 virtual desktops for all your staff. Quickly provide the experience that your workers demand, all while enhancing controls and streamlining maintenance.

## Citrix desktops-as-a-service (DaaS) solutions

Deliver desktops to any device securely from the cloud with our simple turnkey service that eliminates the complexity of desktop management and enables you to quickly deliver desktops and apps to any device, from anywhere.

## Purchase options

### Citrix Virtual Apps and Desktops

A complete virtual app and desktop solution to meet all your business needs, giving employees the freedom to work from anywhere, while cutting IT costs.

### Virtual Apps and Desktops can be deployed as a cloud management option within Citrix Workspace

Citrix Workspace is a complete digital workspace that organizes, guides and automates work to redefine personal productivity.

## Customer success

### Saint Francis Hospital and Medical Center

#### The challenge

The 617-bed hospital first deployed a computerized physician order entry (CPOE) system more than 20 years ago. Recently, however, IT leaders at the hospital recognized the need to streamline 34 legacy CPOE applications into a unified electronic medical record (EMR) platform to address the risk of mobile device growth.

**“With our current environment, we can deliver our EMR system, dictation software, imaging viewers and more to thousands of clinicians and staff wherever they are... And best of all, the whole thing is entirely seamless to our end users. Most of them don’t know how it happens—they just know that it works.”**

– Linda Shanley, Vice President and CIO, Saint Francis Hospital and Medical Center

## The Citrix solution

For years, Saint Francis had been using Citrix technology for on-demand app delivery to both physical and virtual desktop infrastructure (VDI)-based desktops. With Citrix Virtual Apps and Desktops, the hospital was able to deploy a new EMR system across thousands of workstations and mobile devices.

## The results

With the smooth deployment of the hospital's new system of care, the \$120M EMR upgrade transferred 1.3M patient medical records to a single, integrated system, successfully completing one of the most ambitious projects in the hospital's long history.
